

Loop driver module for KSA702/705 control panels

KAL701

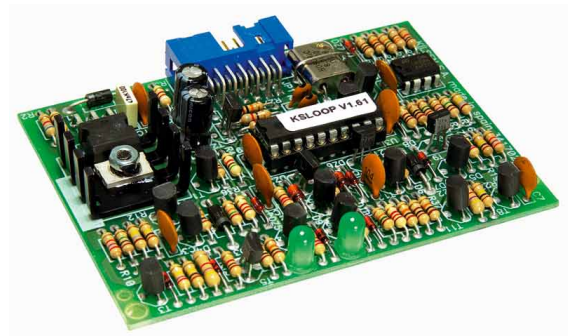

The KAL701 1 loop expander allows for an easy upgrade to the KSA702 and KSA705 analogue addressable fire panels. Each module consist of a simple plug in card and requires no additional settings or connections for full functionality. The KAL701 has loop isolators supplied on both drivers and allows full class-A loop functionality with up to 250 device addresses.

Specifications

Number of loops	1
Loop characteristics	
Capacity	250 addresses
Maximum load	400 mA / 26 VDC to 32 VDC
Maximum electrical characteristics	44 Ohm / 500 nF
Maximum loop length	2 km

Ordering Information

KAL701 Loop driver module for KSA702/705 control panels

- Expands the loop capabilities of the KSA702 and KSA705
- Allows for the connection of an additional 250 devices per unit
- Two isolated drivers support full class-A operation
- No hardware configuration required
