

RS485 communications module for KSA702/5 control panels

KAL785

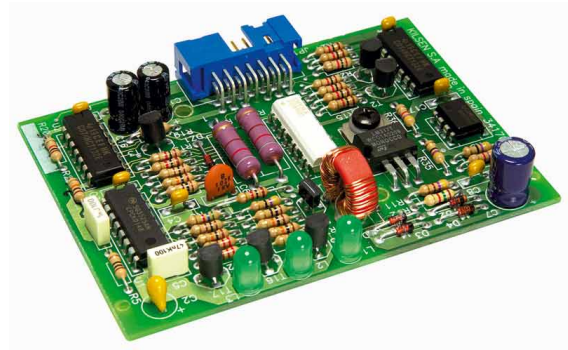

The KAL785 RS485 expander allows for an easy upgrade to the KSA702 and KSA705 analogue addressable fire panels. Each module adds an additional industry standard RS485 communication port to the panel. This port could be used for communications with other network nodes in the fire panel network.

Specifications

| | |
|--------------------------|----------------------------|
